

POLYSTAR ANNOUNCES ISO 9001 AND 27001 CERTIFICATIONS, PROVIDING ENHANCED QUALITY AND INFORMATION SECURITY MANAGEMENT FOR CUSTOMERS AND PARTNERS.

Stockholm, SWEDEN, 27th September 2018 – Polystar, a leading supplier of Customer Experience Management, Service Assurance and Network Monitoring solutions for the telecom industry today announced that it has achieved certifications for ISO 9001 and ISO 27001, covering quality and information security management respectively.

ISO 9001 is the internationally recognised standard for quality management systems, and Polystar OSIX has been independently audited by an accredited Certification Body to ensure compliance. The scope of the certification includes the Polystar OSIX management system and is applicable to the development of Service Assurance, Network Monitoring, and Test Solutions for Telecom Operators, Service Providers, and Network Equipment Manufacturers worldwide.

ISO 27001, meanwhile, specifies the requirements for an information security management system (ISMS). It also includes requirements for the assessment and treatment of information security risks, tailored to the needs of the organisation, including the legal, technical and physical controls involved in the organisation's risk management process. Achieving this certification demonstrates that Polystar manages information security systematically, protecting its own and its customers' data.

"Quality is fundamental to Polystar and forms a core element of our company values," said Mikael Grill, Polystar's CEO. "Our focus on quality not only helps us to assure excellence for our customers, it also helps us to innovate, ensuring that we deliver continuous improvements to our customers and increasing the value they obtain from our products and solutions."

In addition, the compliance to ISO 27001 also indicates how Polystar fulfils obligations of the new data protection regulations, the GDPR. It reinforces Polystar's efforts to establish, maintain and continually improve its information security management system.

"Achieving ISO 27001 certification demonstrates that we fulfill the very highest information security standard covering, for example, confidentiality, integrity and availability. It also shows to our customers that Polystar treats the requirements of GDPR with the utmost seriousness. We will continue to ensure that all of our customers benefit from our GDPR compliance.", says Jan Öhman, Chef Information Officer at Polystar.
